Principal (Prof. B.N.Rajole)

#### ACKNOWLEDGEMENT

Inspiration and guidance are invaluable in every aspect of life, especially in the field of education, which I have received from our respected H.O.D. Mrs.A.N.Birari who has guided me in the first two phases of dissertation work and gave earnest co-operation whenever required. I would like to express my sincere gratitude towards her.

I am pleased to announce that my presentation of the project as well as the report would not have been completed without the able guidance and complete support of **Ms.P.N.Patil** those helped me at each and every step in every possible way. She always provided me with access to the latest technology and facilities and encouragement at every point and took active participation in the achievement of my objective. Heartfelt my foremost thanks go to dissertation guide and help of my well-wishers and colleagues.

At last, I would like to take this opportunity to convey thanks to all my staff members, who directly or indirectly encouraged and helped me to complete my work on time and contributed their valuable time in helping me to achieve success in the work of project.

# **INDEX**

| Sr.no. | Name of topic                   | Page no. |
|--------|---------------------------------|----------|
| 1      | Abstract                        | I        |
| 2      | Introduction                    | 1-3      |
| 3      | Literature Survey               | 4-6      |
| 4      | Requirement Analysis            | 7        |
| 5      | System Description              | 8-12     |
| 6      | Modeling and Designing          | 13-33    |
| 7      | Testing                         | 34-39    |
| 8      | Conclusion and Future Scope     | 40       |
| 9      | Part List/ Cost (if applicable) | 41       |
| 10     | Result                          | 42-43    |
| 11     | References                      | 44       |
|        | Appendix-1                      |          |
|        | Appendix-2                      |          |

## List of the Tables:-

| Table no. | Title of Table                   | Page no. |
|-----------|----------------------------------|----------|
| 3.1.1     | Software Requirement             | 7        |
| 3.2.1     | Hardware Requirement             | 7        |
| 6.1.1     | Donor Login Test Cases           | 34       |
| 6.2.1     | Donor Registration Test Cases    | 34       |
| 6.3.1     | Blood Bank Test Cases            | 35       |
| 6.4.1     | Search(Donor Request) Test Cases | 35       |
| 6.5.1     | Admin Test Cases                 | 36       |

### **Abstract**

This project is aimed to developing an online Blood Donation Information. The entire project has been developed keeping in view of the distributed client server computing technology, in mind. The Blood Donation Agent is to create an e-information about the donor and organization that are related to donating the blood. Through this application any person who is interested in donating the blood can register himself in the same way if any organization wants to register itself with this site that can also register. More over if any general consumer wants to make request blood online he can also take the help of this site. Admin is the main authority who can do addition, deletion, and modification if required. The project has been planned to be having the view of distributed architecture, with centralized storage of the database. The application for the storage of the data has been planned.
